INTRODUCTION

Full-stack developer who picks up new tech quickly and likes knowing how things work under the hood, whether it's a cloud system at work or an electronics project at home. I care about building things that still work well long after they ship.

WORK EXPERIENCE

Entian Solutions

Jan. 2025 – Present

Full-Stack Developer

Sofia, Hybrid

- Develop an internal web application for managing Microsoft SQL Servers and databases across 3 regions, built with ASP.NET Core and Angular
- Migrated the application from on-premises infrastructure to Azure, cutting wait times for database moves in half and improving scalability
- Built an integration for moving databases from the application into Databricks
- Took on the team lead role for two developers, handling client communication alongside hands-on development

Hitachi Solutions

Jul. 2023 – Dec. 2024

Technical Analyst

Sofia, Hybrid

- Developed features for a scalable, event-driven serverless platform for a renewable energy company, using .NET Core, Entity Framework and Azure Functions
- Migrated a legacy ASP.NET MVC application to .NET Core and Blazor
- Contributed to designing and building a custom compliance solution as part of a large team, and helped present it to non-technical stakeholders
- Helped onboard new developers and took part in internal training on React and TypeScript

EDUCATION

Sofia University – Faculty of Mathematics and Informatics

Oct. 2021 – Oct. 2025

Bachelor's degree in Information Systems

Sofia, Bulgaria

CERTIFICATIONS

AZ-900: Microsoft Azure Fundamentals

2023

SC-900: Microsoft Security, Compliance, and Identity Fundamentals

2024

SKILLS & INTERESTS

Languages & frameworks: C#, ASP.NET Core, Entity Framework, Blazor, Angular, React, TypeScript

Cloud & data: Microsoft Azure, Databricks, SQL Server, PostgreSQL

Tools & practices: Git, Azure DevOps, GitHub Actions, Agile/Scrum

Interests: Nature; Hiking; Photography; Weightlifting; Music; Electronics; Internet of Things
